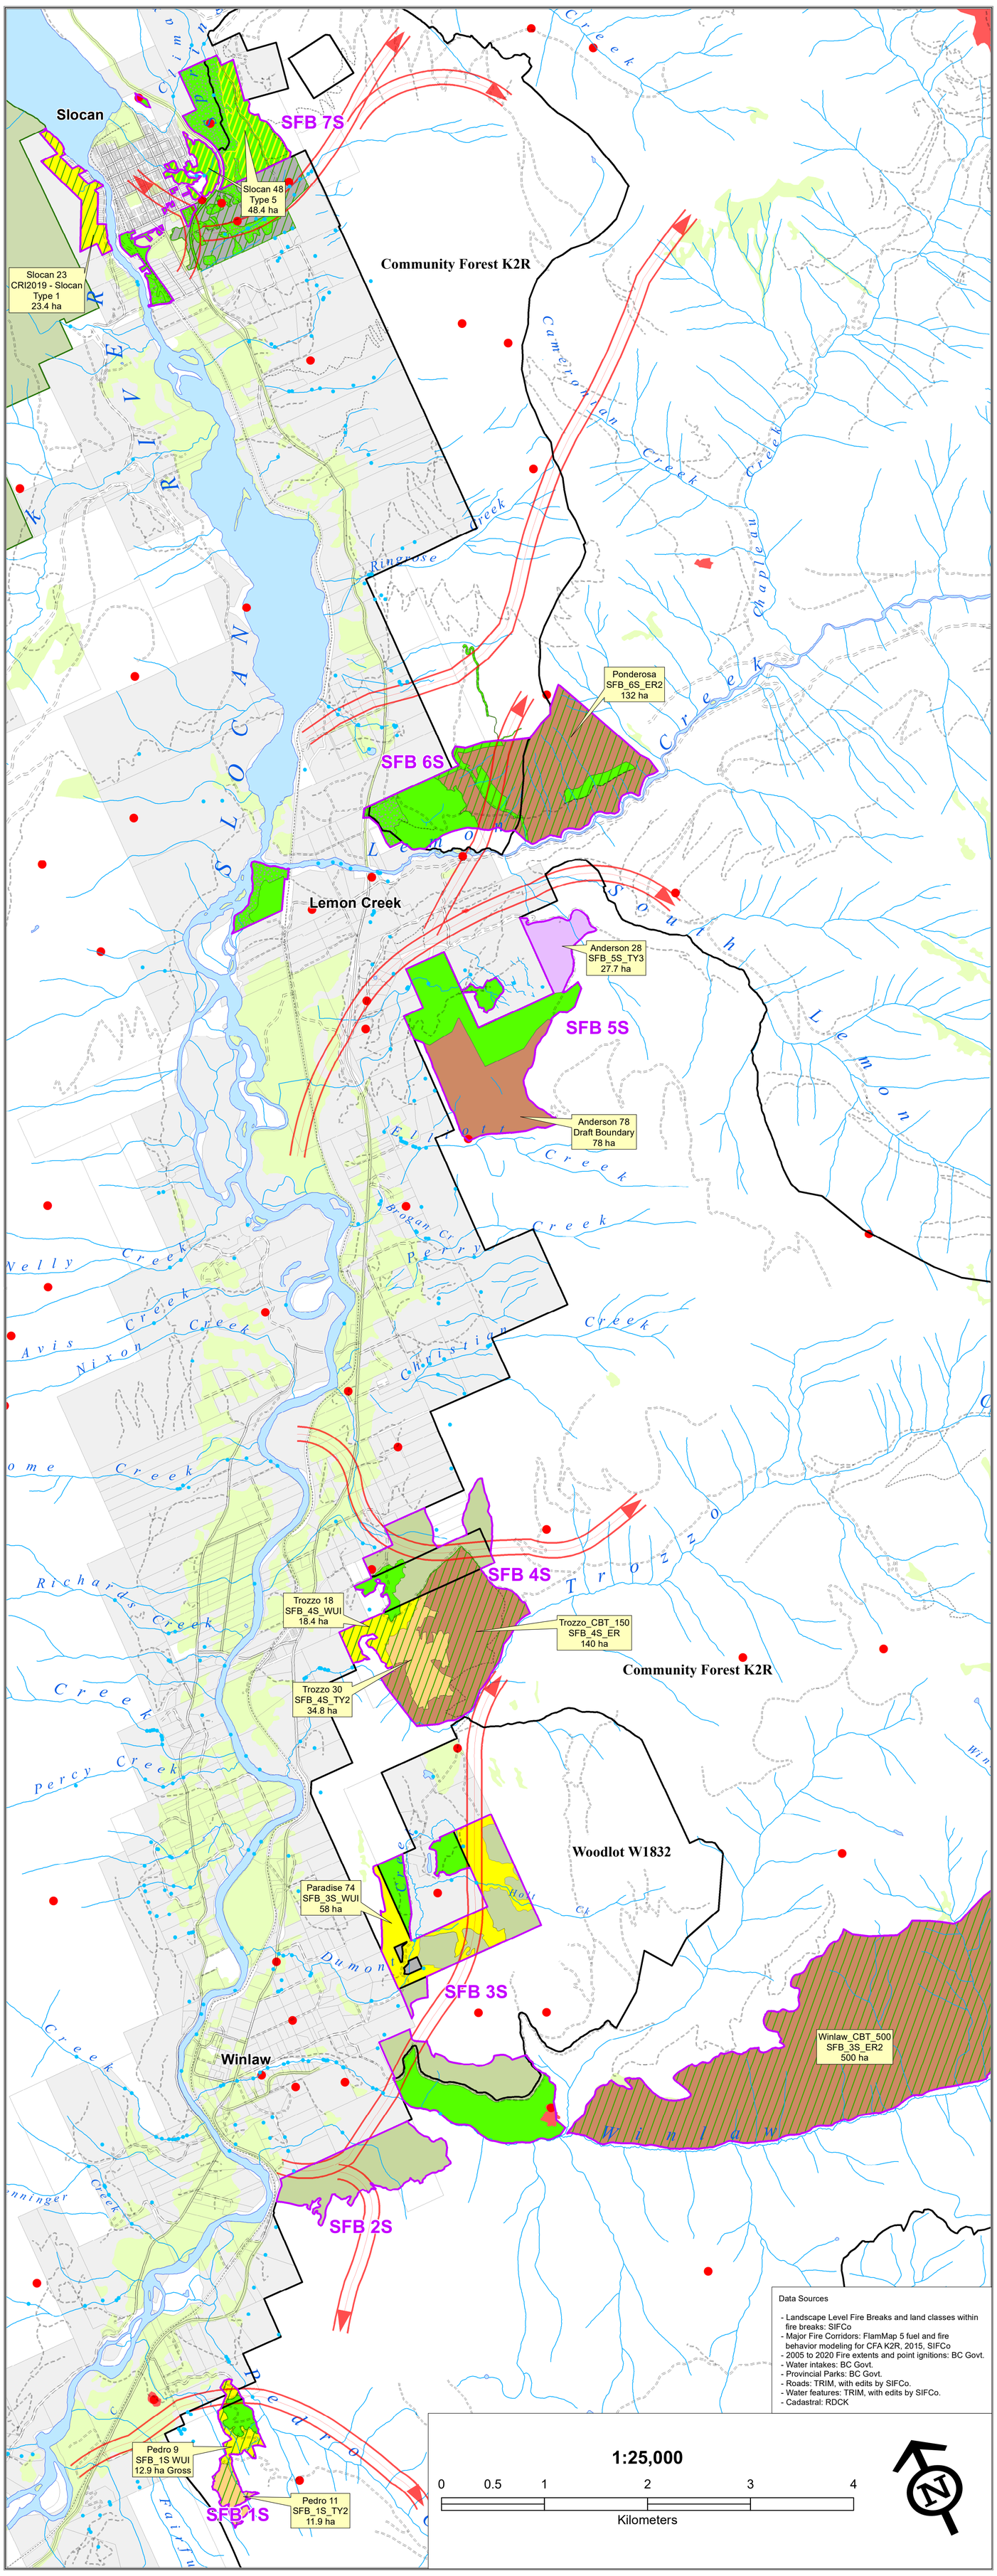
Community Forest Agreement K2R

February 2021

Slocan Valley Strategic Landscape Level Fuel Management Plan
South Valley Unit



Landscape Level Strategic Fire Breaks

- Landscape Level Strategic Fire Breaks
- SFB 5S — Strategic Fire Break Designation
- Completed Fuel Management or Ecosystem Restoration Project
- Areas with Low Fuel Loads and Untreatable Areas within Strategic Fuel Breaks
- Other Areas with Low Fuel Loads and Untreatable Areas

Note: Areas with low fuel loads includes managed agricultural fields, wetlands and bare soil. Untreatable areas includes steep slopes and riparian reserves.

Planned Fuel Management Projects

- Type 1 — Planned Wildland-Urban Interface Fuel Management
- Type 2 — Planned Post-Harvest Fuel Management
- Type 3 — Planned Mechanized Fuel Management
- Type 4 — Planned Prescribed Burn for Fuel Management and Habitat Restoration
- Type 5 — Planned WUI Maintenance Re-Treatment
- Planned Projects which are Funded

Future Fuel Management Projects

- Future Fuel Management Projects in Planning and Development
- Forested Areas on Private Land within Strategic Fuel Break

- Major Fire Movement Corridors from FlamMap5 Wildfire Simulation Modeling
- Fires less than 1 ha in size from 2005 to 2020
- Fires larger than 1 ha in size from 2005 to 2020

Ownership and Tenure
- Community Forest Boundary
- Private Land
- Provincial Parks

Water Features
- Lake or River
- Streams
- Water Intake

Transportation
- Highway
- Other Road
- Trail

Location of Map Area in Relation to Community Forest K2R and RDCK Area H
